

## Polyester Staple Fibre Mattress.

In an effort to provide a superior mattress and staying true to our environmental pledge we formed a partnership with Swedish company CE Produkter [www.ceprodukter.se](http://www.ceprodukter.se) who specialises in innovative textile fibre products from recycled materials. The result is a mattress made from Polyester Staple Fibre derived from PET bottles.

Polyester Staple Fibre is anti-dust mite and fungi free. It is breathable and has a very low fire risk. Further, the fibre has less than 20ppm of formaldehyde (virtually zero and much, much lower than foam), which is ideal for babies and children.

All fibres by CE Produkter are Oeko-Tex class 100 certified:

Eco-Tex Standard 100 is a global testing and certification system for screening harmful substances in consumer textile products. It was developed in 1992 by a group of European textile institutions.

It is the dominant global standard in the Oeko-labelling field of textile products, with over 48,000 certificates issued worldwide since its inception. This equates to over 5,000 manufacturers and over 1 million licenced products. See [www.oeko-tex.com](http://www.oeko-tex.com) for further information.

The carbon foot print of the mattress production is minimised by the recycling of PET bottles.

The mattresses all have a 100% cotton cover which can be machine washed.

We trust that you will be very happy with your  mattress.

Regards,

Jacqueline Orvelind
